

KUSH BHARDWAJ

Full Stack Engineer

+91-9971174081 • bhardwaj.kush96@gmail.com • India

Summary

I am an experienced Full Stack Developer with 8 years of expertise in backend and frontend technologies.

- Engineer robust back-end services with NodeJS and Java, optimizing for scalability, reliability, and security.
- Excelling in various programming languages and frameworks, and I'm continuously striving to optimize systems and processes. I take pride in my problem-solving abilities and have been recognized for my contributions to projects.

Experience

Barco Noida, India
Lead Software Development Engineer 02/2026 - Present

- Worked on a Linux systems daemon written in C that orchestrates real-time media playback across multi-display; the service manages the full lifecycle of 10+ types of child media processes via D-Bus and WebSocket JSON-RPC.
- Integrated PipeWire and WirePlumber for per-source audio node volume/mute control and dynamic audio output routing across HDMI/DP and USB audio devices.
- Improved CI pipeline reducing PR checks runtime by 60%.
- Introduced storybook integration for better common component management.
- Working on Angular app to integrate media streams from the C layer to end user.

Tractable Noida, India
Senior Software Engineer 07/2025 - 02/2026

A leading AI company specializing in computer vision solutions for insurance and automotive industries.

- Lead a team of 5 to help migrate existing multi repo codebase into a modular monorepo.
- Created a configurable layout system for creating UI, improving the development time by 50%.
- Had KT sessions on how to use agenetic AI for better coding experience.
- Created a component library using storybook for design harmonization across app increasing productivity by 60%.
- Created a configurable strategy rule base engine for selection logic.
- Help to create stateless and stateful Orchestration Engine for different workflow.

Medidata (Dassault Systèmes) Pune, India
R&D Engineer 07/2020 - 07/2025

A company that specializes in clinical trial technology and data management.

- Stream lead responsible for a team of 5 to create Patient and C.T.O. centric UI's for clinical trials.
- Received consecutive promotions in the last 2 Annual Performance Review cycles.
- Implemented transpiler for creating TypeScript interfaces, Avro schema, SQL schema and CRUD API implementation from a GraphQL schema, increasing development time by 80%.
- Created pipelines to pull data from appropriate device providers and passed it through different stages for validation and de-duplication.
- Re-modeled schema for scalability and consistency among relations between tables.
- Conducted knowledge sharing sessions on JavaScript, TypeScript, GraphQL, and Java.
- Awarded the Champion award in India for performance and project contribution.

Buildsys New Delhi, India
Full Stack Software Developer 07/2018 - 06/2020

A multi-platform cloud-based end-to-end software to manage and provide solutions for the construction project's life-cycle.

- Responsible for creating meetings, file management, drawings, RFI and tasks using ASP.Net framework.
- Developed autogen scripts that ports backend DTOs and APIs to Dart.
- Developed entire mobile architecture in Flutter including local database.
- Designed and implemented common architecture for PDF and meeting invite generation in C#.
- Spearheaded a team of two to integrate meeting and RFI modules on backend, web and mobile.

Key Achievements

☆ **Champion Award**
Awarded Champion award for outstanding contributions and performance in projects.
